

Powering exceptional eDiscovery teams worldwide.

Manage eDiscovery workflows in one intuitive platform.

Agility Blue's Workflows, Dashboards, Communications, and Reporting features combine to create a comprehensive platform for managing your team's workload. Easily create, track, collaborate and report on all your team's projects.

Dashboards

Ensure projects are efficient and effective by tracking deadlines, project details, and assignments in a dynamic view. Dashboards provide a visual overview of your team's work-in-progress.

Workflows

Create projects and tasks on the fly, and apply custom forms, templates, and automations to streamline workflows. Record volumes, evidence, and billing all in one central location.

Communications

Optimize communication on projects through the Communications Suite. Use Agility Blue's communications system to record comments, notes and events, collaborate with team members, and submit requests.

Reporting

Gain powerful insights into your team's performance through Agility Blue's reporting capabilities. Connect Agility Blue's API with other software platforms, including billing, matter management and review applications.
